SUMMARY

Junior Frontend developer with 6+ months of experience designing and building responsive websites. Proficient with HTML, CSS and JS Framework (React). Eager to tackle more complex problems and continue to find ways to maximize user efficiency.

WORK EXPERIENCE

ONE THINKING SOLUÇÕES INDUSTRIAIS   Sep 2023 - Dec 2023 - São Paulo, Brazil

Industry: Automation
Role: Frontend Developer

The company specializes in providing support and developing software solutions for automotive machinery. Its primary focus is on offering comprehensive assistance in key areas such as Programmable Logic Controllers (PLCs), Human-Machine Interfaces (HMIs), Supervisory Systems, and Database management. With a highly skilled and experienced team, the company excels in providing customized solutions that meet the specific needs of its clients within the automotive industry.

Cryptocurrency Algo Trading Developer specialising in real-time market data processing and automated trading strategies.

Responsibilities

- Developed front-end components and interfaces for automation software using HTML, JavaScript, tailwind, and React;
- Collaborated with team members to integrate front-end with back-end systems written in C#;
- As a Frontend Developer, I facilitated effective frontend-backend communication by utilising Postman for API testing and resolving backend-to-frontend data discrepancies enhancing application functionality and reliability. Additionally, I managed MySQL databases to fully understand data flow, optimizing front-end features based on backend capabilities.

Achievement :

- Provided HTML, JavaScript, Tailwind and React front-end development to create dynamic user interfaces for automation software. I performed checks on Postman for API testing and MySQL for database management, to see if calls were being made correctly.

ALGAR TECH   May 2023 - Sep 2023 - São Paulo, Brazil

Industry: Telecommunication
Role: Help Desk

[Algartech](#) offers complete CX (customer experience) and MSP (IT environment management) solutions, based on intelligence and data management, to deliver the best customer service.

Responsibilities

- Setup and improve development environments for customers to ensure they work well together;
- Deal with all problems or questions about internal services by offering extensive IT assistance quickly and efficiently;
- Able to install and set up Microsoft Office, network systems, firewalls etc. to make them more effective;
- Keep track of Active Directory (AD) user profiles in terms of the accuracy of data recorded on them as well as ensuring security is observed.

Achievement :

- Provided IT support for the company's internal services, resolving customer problems and queries. Installation and configuration of Microsoft Office, network systems, firewalls and computer formatting. User profiles are managed and maintained in Active Directory (AD).
